

Assignment 1: GET REQUEST

- Display the parameters sent with the GET request (first_name, last_name)
- Show an error if no parameters are sent
(file: params/process-get-request.php)

Hello Janez Novak, the time is 13:22.

Assignment 2: POST REQUEST

Display parameters send with POST request. Implement the display in the **same file** that displays the form (file: `params/post-form.php`)

This form will send out a HTTP POST request with two parameters:

- `first_name`
representing the value in the first input field, and
- `last_name`
representing the value in the second input field.

First name:

Last name:

Hello Janez Novak, the time is 13:25

Assignment 3: PDO, MySQL, phpMyAdmin

- Get familiar with the book application (files inside /book directory)
- Add an attribute to the book table inside bookstore database with phpMyAdmin:
 - type year
 - after attribute price
 - <http://localhost/phpmyadmin>

	#	Name	Type	Collation	Attributes	Null	Default	Extra
<input type="checkbox"/>	1	id 	int(11)			No	None	AUTO_INCREMENT
<input type="checkbox"/>	2	author	varchar(255)	utf8_slovenian_ci		No	None	
<input type="checkbox"/>	3	title	varchar(255)	utf8_slovenian_ci		No	None	
<input type="checkbox"/>	4	price	float			No	0	
<input type="checkbox"/>	5	year	year(4)			No	None	

Assignment 4: Update the book app

Update the book application so that it will correctly:

- display,
- add,
- and edit

the newly added year attribute

(all .php files in book folder)

Assignment 4: Update the book app

A PHP bookstore
